

Olde Map of the Hamlet and Homesteads of Doel

*"Combining the old and the new ,
that is a nice starting point.
We should not always immediately
think of demolition."*

International architect Zaha Hadid
about her design for the Antwerp Port Authority building

An ecologically sustainable residential
and cultural village

A showcase of Flanders' creativity and
environmental expertise right in the heart of the
international port of Antwerp

Doel

A historical village reborn on its ancient
foundations that will offer new perspectives
to both the economy and society

A precursor of a budding "new economy"
with respect for mankind and our
globe's ecological limits

That is what we want to go for in 2010....
